Quentin Rebergue - Graduate Software Engineer - Linux Systems

Profile

Looking for a full-time position in software engineering with a focus on: Linux Systems, Low-Level, Embedded, Open Source. MSc in Computer Engineering (EPITA - GISTRE) in Systems / Embedded. Fluent in French and English (TOEIC 915, C1). Interests: watchmaking, music, hiking/running, cooking.

Work Experience

- **Software Engineer Intern - Platform team, ARISTA**, Dublin 02/2026 – 08/2026

  Implemented non-zero reset value management for ASIC Physical Table registers across the chip-agnostic Strata infrastructure (SDK parsing, code generation, DMA) in python and C++. Won 1st place at Arista's Hackathon by building an AI agent optimization tool (70% token reduction on internal codebases). Approved for production development.

- **Head of Teaching Assistants - YAKA** / **ACU Program, EPITA**, Kremlin-Bicetre 09/2024 – 02/2026

  Led the national team of 67 TAs and supervised 5 intensive coding bootcamps (Java, C++, JS, C/Bash, SQL) and 7 large-scale projects (compiler, HTTP server in C, malloc, POSIX shell) for 700+ 3rd-year students across 5 campuses. Implemented 1-on-1 code review mentorship model, improving TA-to-student ratio from 1:30 to 1:20.

School Projects

- **RFID Driver** – Developed a Linux kernel character device driver for the MFRC522 RFID reader with file_operations callbacks, SPI regmap communication, and a FIFO command interface. Tested via QEMU emulation.
- **My Docker** – Built a lightweight container runtime in C, using Linux namespaces, pivot_root, capabilities dropping, seccomp syscall filtering, and cgroups. Pulls and mounts a root filesystem from a container registry.
- **42sh** – Shell interpreter implementation in C with complete lexer, parser, and abstract syntax tree (AST). Implements command-line interpretation with support for redirection, pipes, and expression evaluation for Unix-like shells.
- **Tiger Compiler** – Built compiler frontend in C++: lexing, parsing, binding, type checking, desugaring and LLVM IR. Team of 4.
- **ARM project** – Built an STM32F429ZI embedded system acting as a UART command server using libgapcom (Protobuf over UART). Implemented a 4-level log subsystem and an MPU6050 gyroscope driver over I2C with FIFO reads.Team of 2.

Education

- **MSc Computer Engineering, Low-level & Systems (GISTRE)**, EPITA 2020 – 2026
- **Preparatory Class (PTSI) in Engineering Science**, Lycée Jules Ferry Versailles 2019 – 2020

Technical Expertise

- **Programming & Languages:** ASM, Bash, C, C++, CUDA, Java, Javascript, Python, Rust, Shell.
- **Embedded & Hardware:** ASIC interfacing, FPGA, I2C, Raspberry Pi, STM32, UART, SPI.
- **Other / DevOps:** GDB, Git, Kubernetes, Perforce, Security, monitoring, optimisation, testing, valgrind, system analysis.
- **Systems:** Bootloader, DMA, Drivers, GPU, Kernel, Linux, Multithreading, Virtualization, low-latency, real-time, operating systems.
